said edge surfaces, said covered portion being substantially all of said trim that is visible when said trim is installed on the building;

a resin treatment formed on at least the exposed surface of said paper; and adhesive spread between substantially all of said paper and said substrate.

- 25. (New) The wood product of claim 24 wherein said trim is fixedly mounted on said building.
- 26. (New) The wood product of claim 25 wherein said rear surface includes a mounting surface that flushly abuts the building when said trim is mounted thereon.
- 27. (New) The wood product of claim 24 wherein said substrate comprises an engineered wood product.
- 28. (New) The wood product of claim 27 wherein said engineered wood product comprises laminated veneer lumber and wherein said front surface comprises a surface on an outer veneer of said substrate and said edge surfaces comprise edges of veneer layers in said laminated veneer lumber.
- 29. (New) The wood product of claim 28 wherein said laminated veneer lumber comprises plywood.
- 30. (New) The wood product of claim 27 wherein said engineered wood product comprises fiberboard and wherein said front surface comprises a top surface of said fiberboard and said edge surface comprises an edge of said fiberboard.
- 31. (New) The wood product of claim 24 wherein said substrate has a substantially rectangular cross section.
- 32. (New) The wood product of claim 31 wherein said paper covers a portion of said rear surface adjacent both of said edge surfaces.
